

Operation of Pop Up Power Unit jt01 - page 1 of 2

1

Check top of unit for debris such as leaves, rubbish, dirt or snow.

2

Remove all debris (rubbish, leaves, snow) before raising the unit.

3

Put the crank handle into the hole on top of the unit.

4

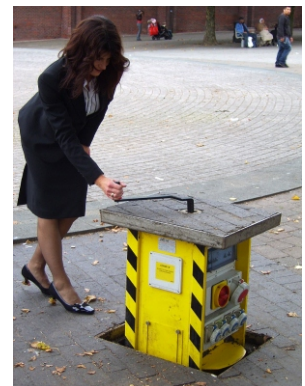

Turn the crank handle to the right (clockwise) to raise unit out of the ground.

5

Continue to turn crank handle to raise unit.

6

Continue turning crank handle until unit is fully raised above the ground.

7

Turn the socket cover to the left (counter-clockwise) to open.

8

Lift the socket cover.

9

When finished using the unit, close socket cover and turn clockwise (to the right) to lock.

10

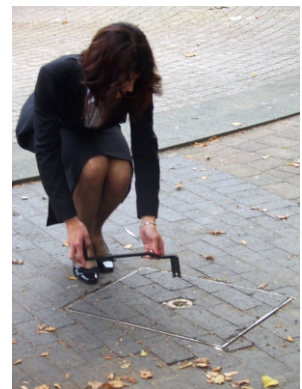

Remove debris (rubbish, leaves, snow) from around the unit.

11

Put the crank handle into the hole.
Turn to the left (counter-clockwise) to lower unit back under the ground.

12

Remove the crank handle when unit is fully lowered under ground. Store crank handle in secure place.
