

Operation of Pop Up Power Unit jt04 - page 1 of 2

1

Remove any debris (rubbish, leaves, snow) before raising unit.

2

Only attempt to raise the unit when the top is fully cleared of debris.

3

Put the hooked end of the handle into the loop on top of the unit to raise the unit.

4

Pull the unit straight up.

5

The unit is fully raised when it locks into place.

6

The raised unit should look like this.

Operation of Pop Up Power Unit jt04 - page 2 of 2

7

Turn the socket cap to the left (counter-clockwise) to access the socket.

8

Once the socket cap is open, access the socket.

9

When finished using the unit, close the socket cap and turn to the right (clockwise) to lock.

10

Remove all debris (rubbish, leaves, snow) before attempting to lower unit into the ground.

11

To lower the unit, use the handle to lift. This will unlock the unit and allow it to be lowered. Lower the unit into the ground slowly to prevent damage.

12

Be sure the unit is fully lowered into the ground. Store the handle in a secure place.
